

# LP® SmartSide® Advantages

### More Impact Resistant

LP SmartSide siding products are more resistant than fiber cement products to impact damage from common projectiles such as golf balls, baseballs and rocks.

### Realistic Woodgrain Texture

LP SmartSide products have a more realistic wood texture than most fiber cement products.

### Time Tested

LP SmartSide products are proven and time tested. LP has manufactured billions of square feet of SmartSide products and they have been installed on millions of homes.

### Easier to Install

LP SmartSide is significantly lighter per linear foot and stronger than fiber cement. It's easier to carry and install on the jobsite and no special tools are required to cut it.

### Up to 33% Fewer Seams

LP SmartSide trim and lap siding comes in 16' lengths vs. fiber cement's shorter 12' lengths, often resulting in fewer seams or joints.

### Possible Cost Advantages

LP SmartSide products are available nationwide through independent dealers. Due to the lighter weight and increased coverage per piece, there are often significant installed cost advantages with SmartSide lap, trim and shakes over similar fiber cement products. Ask your local dealer for details.

### Longer Warranty

The LP SmartSide limited warranty is longer than most fiber cement product warranties.

### No Efflorescence

LP SmartSide products do not contain the natural salts and minerals which sometimes discolor fiber cement products.

### Renewable Resource

All SmartSide products are manufactured with wood (a renewable resource) procured using processes certified by the Sustainable Forestry Initiative (SFI®).

### Reversible

Some LP SmartSide trim comes in reversible smooth and cedar textures, greatly adding to its flexibility on the jobsite.

### Cal. Prop 65 Warning:

*Use of this product may result in exposure to wood dust, known to the State of California to cause cancer.*
