## INTRODUCING LP® SMARTSIDE® OUTSIDE CORNER TRIM

LP® SmartSide® Trim & Siding has added a new product designed to increase install efficiency and take curb appeal to the next level: LP® SmartSide® Outside Corner Trim. This one-piece, pre-primed accessory eliminates the need to build corners during construction, which can lead to faster and easier installation, and enhances exterior aesthetics by creating a sleek, polished corner look. LP SmartSide

Outside Corner Trim is available in cedar texture for a beautiful deep cedar-grain aesthetic and is pre-primed for exceptional paint adhesion. Manufactured with the advanced durability, LP SmartSide Outside Corner Trim is designed to resist water intrusion or seam separation. Reach out to your local LP Sales Rep for more information.

## TECHNICAL CORNER

LP recently made some changes to the SmartSide product catalog. One of those changes is siding thickness labeling. The actual thickness of LP SmartSide products has NOT changed. The change in the 2021 catalog only reflects a change in thickness labeling. To assist you in better understanding this labeling change please refer to question number 24 in *Technical Bulletin #001 - Frequently Asked Questions* which can be downloaded at [LPCorp.com](http://LPCorp.com).

### 24. Why has the thickness of LP SmartSide trim and siding products in the 2021 catalog increased?

A. The actual thickness of LP SmartSide products has not changed. The change in the 2021 catalog reflects a change in thickness labeling which is now consistent with industry standards outlined in Product Standard PS 2-18, Appendix D, Table 1. Previous "minimum thickness" labeling was based on the lowest potential thickness for individual pieces. The new "thickness" labeling now represents the lower tolerance of the products average thickness of any unit of material.

## EXPERTFINISH NOW AVAILABLE IN ALL 16 COLORS FOR THE FULL EXPERTFINISH PORTFOLIO
