

## WHY IS HPL THE RIGHT SURFACE FOR YOU?

### Provides greater design flexibility.

When you consider that HPL can be used in either high- or low-touch applications, then you combine that with an industry leading design offering, it is clear to see why HPL provides you with the highest degree of design and application flexibility.

### Superior durability.

High-touch applications demand the durability and performance only HPL can deliver.

**24X** **Wear Resistance**  
HPL surfaces with AEON™ Technology are dramatically more durable compared to TFL.

**5X** **Scuff Resistance**  
Much more resistant to scuff damage than TFL, HPL stands up against day-to-day use.

**3X** **Impact Resistance**  
With impact resistance superior to TFL, you can have confidence in your surfaces.

### Helps achieve a lower cost of ownership.

HPL can provide better long-term design integrity, lower day-to-day maintenance costs, and greater long-term value for a much lower cost of ownership overall.

### Innovative.

HPL is available with a variety of different innovative solutions such as AEON™ Enhanced Scratch & Scuff-Resistant Performance Technology, Antimicrobial Protection, and specialty applications such as High Wear, Traceless™, Chemical-Resistant, and Fire-Rated Laminates.

Find out why HPL is the right surface for you.
