

Your Dream Design. Our Cedar Siding. *Limitless Possibilities.*

CEDAR VALLEY

Handcrafted Shingle Panels

Cedar Valley Products

Western Red Cedar Shingle Siding System

Our standard panels are eight feet long with exposures of 7-1/8" and 5.3". Choose from even butt, staggered butt, and open keyway styles. Special exposure panels from 3" to 14" are available.

Cedar Valley's Shingle Panel System is the ideal choice for your home, light commercial or upscale job. No other exterior wall treatment, natural or man-made, protects your investment better. Lightweight, durable, easy to install and with the popular blind nail application, our panels are your best choice for cedar shingle projects.

Vertical grain 7-1/8" even buttline

Vertical grain 7-1/8" even buttline with open keyway

Vertical grain 7-1/8" staggered buttline with open keyway

Matching Accessories

A Complete Line of Accessories

Matching Flush
90° Bundle

Leave no detail uncovered with a full line of standard accessories to complete most shingle style designs. Flush mounted corners in 90 and 135 degrees, decorator accents, and radius wall panels handle most siding needs. All accessories are handcrafted with the same attention to detail and will perfectly match the panel in style, exposure, thickness and texture.

Decorator Shingle Panels

Decorator Panels are available in eight styles and a wide array of colors. Custom Decorator Panels are also available.

Round

Octagon

Hexagon

Full Cove

Fishscale

Diamond

Diagonal

Arrow

A Wide Array of Finishes

Cedar Valley shingle panels are available in a range of finishes including regular band saw cut or combed-textured surfaces, as well as factory finishing in a rainbow of colors to suit your specific taste. Call today to get a free sample with the finish of your choice.

Why Cedar Valley?

An Elegant Aesthetic

With no exposed fasteners in a blind nail application, natural Western Red Cedar shingle panels create a rich appearance that is both timeless and tasteful. The striking facade of "Nature's Finest Siding" creates an inviting, yet breathtaking, beauty.

Relentless Durability

The Cedar Valley name has become synonymous with nature's best. Combining characteristic beauty with exceptional stability, our panels offer a natural resistance to moisture, decay, and insect damage. Additionally, these 100% kiln-dried Western Red Cedar panels have been engineered to withstand hurricane winds close to 200 miles per hour, offering the best available wind uplift resistance.

Simplicity and Ease

A dramatic exterior presentation has never been simpler. Requiring only standard tools to install, the Cedar Valley system provides quality, handcrafted results with no need for specialized labor. The panel system can be installed up to six times faster than individual shingles. The smooth back surface allows for easy marking and sawing, and the overlapping end joints require no caulking. The blind nail application leaves no exposed fasteners, only a flawless appearance.

"I use Cedar Valley siding because of the curb appeal it adds to my homes. They work with me to turn my unique design ideas into a beautiful finished siding project!"

— John Pittman III, AIA Architect

Code and Technical

Cedar Valley Handcrafted Shingle Panels provide protection and beauty for generations. Our current design has been in the field since 1984 with amazing results. In addition to the unbeatable curb appeal, we have tested for fire, wind, and water performance including:

ASTM E330 Wind Uplift Test Criteria

1. 1-Course 5.3" — 185 mph
2. 1-Course 5.3" Coastal — 191 mph
3. 1-Course 7-1/8" — 171 mph
4. 1-Course 7-1/8" Vented — 192 mph
5. 1-Course 14" — 184 mph

Other Testing

Average Thermal Resistance
ASTM C 518-91 - 0.96 - R
Water Penetration Test — Passed
Uniform Static Air Pressure Difference
Testing ASTM E331 — Passed

The Cedar Valley Story

Before Tom Marshall founded Cedar Valley, he owned a building material supply company. One of the products he sold was a shingle siding panel. When a customer had a complaint with the panels, the manufacturer refused to take care of the issues. Tom believed that a company should stand behind their products, so he decided he would make a better shingle panel. He felt his customers deserved a high quality shingle siding that not only looked better than hand applied shingles, but could be installed faster and easier without giving up any design flexibilities. He made a panel system that architects could use in their designs and contractors could install with confidence.

Since 1982, Cedar Valley has been busy refining our products and improving our manufacturing process. We produce the highest quality western red cedar shingle products because we believe our customers deserve the best siding system for their homes.

Nature's Finest Siding

Drawing its beauty from the strength of our natural wood, our cedar shingle panels can bring your dream home to life. Architects and designers originally used cedar shingles to add flair to the homes of wealthy eastern seaboard merchants in the late 19th century. Today, architects rely on our cedar shingle panels to create award-winning designs that set off an intriguing shape, emphasize a unique turret, or enhance a deep front porch.
